

We are pleased to announce that we have expanded the environmental certification across our manufacturing network to include additional locations certified to Forest Stewardship Council (FSC) and Sustainable Forestry (SFI) Chain-of-Custody standards. We have also added Rainforest Alliance Chain-of-Custody certification at five locations.

Multi Packaging Solutions now operates the most extensive sustainable print and packaging network in the US with seven FSC Chain-of-Custody Certified facilities, five Rainforest Alliance Chain-of-Custody Certified facilities, and two Sustainable Forestry Initiative (SFI) Chain-of-Custody Certified facilities.

These additional certifications offer unparalleled options for print and packaging produced to international standards for sustainable forestry. Chain-of-Custody certification is our promise that products produced in our manufacturing network maintain the integrity of the FSC, SFI, and Rainforest Alliance labels. It ensures that controls are in place to prevent mixing of certified paper and paperboard with uncertified stocks.

Our certified network now includes the following:

FSC and SFI Certified Locations:

Dallas, TX
South Plainfield, NJ

FSC and Rainforest Alliance Certified Locations:

Indianapolis, IN
Louisville, KY
Holland, MI (2 facilities)
Lansing, MI

These redundant certifications across several of our facilities offer back-up and surge capacity for all FSC, Rainforest Alliance, and SFI labeled products.

I look forward to meeting with you to discuss these new products and capabilities.
